Source: XDA Developers.Com Can I Recover Deleted Photos From Vault App In Android Phone? When your important photos get erased from the app which you have hidden from others, then it becomes essential to rescue those images, but how? Here you will get some simple ways to retrieve deleted photos from vault app. Method 1: How To Recover Deleted Photos From Vault App with ES File Explorer File Manager If you are using any lock application on your phone then you should know that most applications come into two categories like: Hiding using encryption Hiding in dot folders (foldername) If you files are hidden using encryption then they might have low chances of recovery because, for that, you have to know the good decrypted application. But for the second one, its easy to rely on explorer that easily recovers the hidden files from dot folders like ES File Explorer File Manager. This file manager enables you to show hidden files and you can check all the files or folders for your deleted photos in the application folder. And if the lost photos or videos are not visible then you can search using the characters mentioned: for photo, .jpeg and for video, .mp4. Now follow the below steps to rescue wiped away photos from vault app First, install Es File Explorer File Manager and then launch it. Go to settings and enable "show hidden files". After that, go back to home directory and search ".My security" folder. Open the folder and you will see many files named as "24ad4ca5" Now select search option and then "Advanced options". There you have to input size 10kb-10mb that may differ with size. Here you have to select "all files" and then tap search. Here you will get several files extensions from which you have to open them as image At last, change the extensions of files into jpg/mp4 with the help of the multirename tool Its done now and you can mode your photos to custom folders. Apart from this, there is yet another option to get back the deleted photos and that is by connecting Android phone to PC. For that you have to enable hidden files via control panel > folder option. After that you can search for the lost photos by putting wildcard character like *.jpeg; *.mp4.
